ASTM Compliance and Product Certification for Rebar

Reinforcing steel specified on the Certified Mill Test Report as ASTM A615, A706, or both conforms to these ASTM specifications.

The identified steel shipped is composed of the heat indicated and represented by the samples tested.
The test results indicated on Certified Mill Test Reports are actual test results obtained on samples of the steel heats. All sampling, chemical analysis, physical testing, and measuring are performed following ASTM A615, A706, or both.

Sincerely,

Ben Lovell
